Hinting is applied to each letter for better screen resolution and an extended kerning table is built into each font. With more than a thousand kerning

With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give you the the legibility of a text face.

Each Unifonts typeface is hand-digitized with artisan care, using the minimum amount of points to describe the face outline, saving you precious download time.

With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give

With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give you the legibility of a text face. You get high quality from a 300 dpi laser printer to a high resolution imagesetter. Compatible with virtually all applications, Unifonts original typefaces are a must in any desktop publishing environment.
