Hinting is applied to each letter for better screen resolution and an extended kerning table is built into each font. With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give you the the legibility

With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give you the the legibility of a text face. You get high quality from a 300 dpi laser printer to a high resolution

Each Unifonts typeface is hand-dig-
 itized with artisan care, using the
 minimum amount of points to
 describe the face outline, saving you
 precious download time. Hinting is
 applied to each letter for better
 screen resolution and an extended
 kerning table is built into each font.

*With more than a thousand kern-
 ing pairs, the majority of Unifonts
 typefaces are designed to be used
 as display and are precisely cut to
 give you the legibility of a text
 face. You get high quality from a
 300 dpi laser printer to a high res-
 olution imagesetter. Compatible*

With more than a thousand kerning pairs, the majority of Unifonts typefaces are designed to be used as display and are precisely cut to give you the legibility of a text face. You get high quality from a 300 dpi laser printer to a high resolution imagesetter. Compatible with virtually all applica-
 tions, Unifonts original typefaces are a must in any desktop publishing environment.
